

Manchester United

Fahad Murtaza
Comp 3160

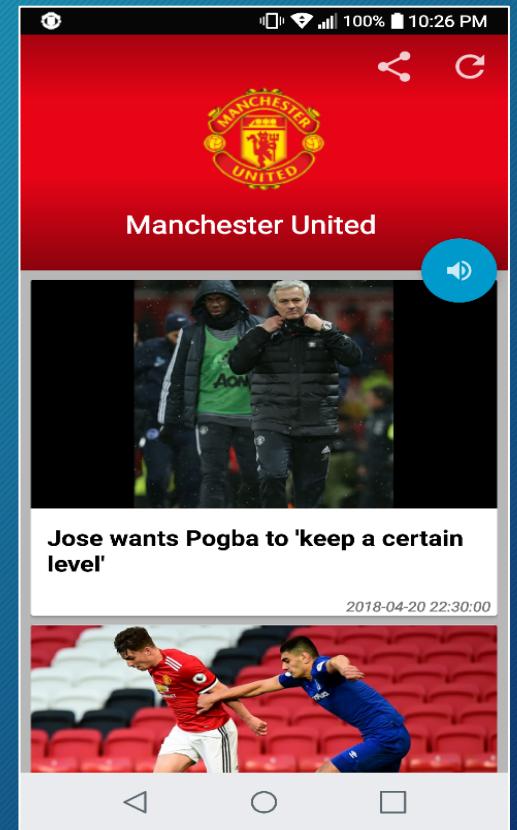

The Idea

- To create a simple application that gives the user latest news on about the Club.
- Similar idea to one football and Manchester Live

Scenario

- A user runs the app.
- Sees the latest news/can scroll through to view all
- can click on any of the card view items and see a full description of the news
- User can share the news with other
- User can refresh the feed to confirm latest news
- Can play the Manchester United anthem via the media player button.

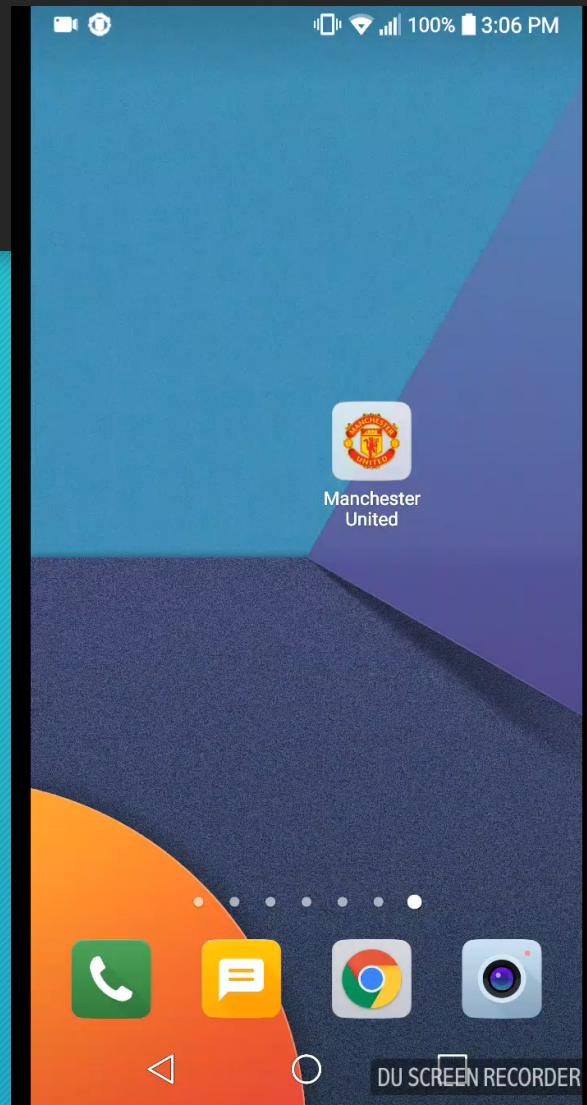

Technologies

- RSS Feed
- RecyclerView
- CardView
- AsyncTask
- Picasso
- Notification
- Media Player
- Internet Connection

Demo

Not working / features I would like to add

- comment on the news
- A list of all season games
- A game scorecard
- Live notification
- Notification on the next game
- Additional feature
